

Sydney HEMS Research Process

Have a research idea? Discuss it with your colleagues then chat to Brian or Matt

Idea put forward to research committee for comment prior to further development (Chair = Brian Burns)

Researcher completes the following HETI online modules

1. MHPOD: Ethics in Healthcare Research
2. Research: An Introduction for beginners
3. Welcome to Research – Planning the research process.

https://hetionline.cit.health.nsw.gov.au/hetionline/oam_login.jsp

Save your certificates for uploading to RedCAP

Complete the Sydney HEMS Research Protocol

(see appendix of Research Guideline).

This will overlap significantly with a lot of the Ethics application questions allowing identification of issues before starting

Allocate yourself time to go over the methodology with Sandra Ware. Is your project achievable?

Ethics application for all projects
(excluding audits)

<https://au.ethicsform.org/SignIn.aspx>

note anything involving the airmaestro database still needs an application

Site specific application

following ethical approval

also at <https://au.ethicsform.org/SignIn.aspx>

Register all projects with a recognised registry

1. Clinical trials with the Australia and New Zealand Clinical Trials Registry

<http://www.anzctr.org.au/>

2. Observational studies with the open science framework

<https://osf.io/>

Start data collection and analysis using RedCAP software

All project related files (ethics/protocol/HETI certificates) uploaded to the RedCAP project folder
