

## COVID19 Mission Readiness Checklist HELO

Team Brief/Risk Assessment performed with ACC  
including DRC and HDS in call (If ship job then MO will replace HDS)

☐

Aircraft quarantined for mission – 15min required to prepare

☐

IAM cover attached but not zipped up

☐

Put Ipad and Duty Mobile in zip locks plastic bags to enable  
use in the red zone for checklists and calls if necessary

☐

Prepare water/snacks and consider opportunities to pre and  
re-hydrate during mission (eg if needing to doff after RSI etc)

☐

### Can be removed

Two hand held spot lights (during the day)

☐

RSA winch bumper rail

☐

1 x rear seat (only one to be left behind)

☐

One O2 flow port can be left behind

☐

Placing suction equipment in plastic bagging

☐

### Additional Cabin contents to check

David Clarkson Headsets packed

☐

PPE pack containing 10 sets of full PPE including Face Shields/Boots  
(with hand gel, hazardous waste bags and plastic bag covers)

☐

### Consider need for:

Ultrasound (will they have their own one at hospital?)

☐

Small bag with vomit bags/wipes/gloves (for non-intubated patients)

☐

Blood – only if patient actively bleeding

☐

### Other Considerations:

NVG Screen to be closed for transport

Medical Staff to wear David Clarkson headset, PPE over fire retardant uniform - no requirement for  
roaring forties jacket or harness if pilot has planned for an overland flight for patient transport leg
